RE: Sorority Site Development  
UT Knoxville  
SBC No. 540/09-19-07

Dear Ms. Hoyos:

I am responding to your letter of May 6, 2010 on behalf of Chancellor Cheek.

The University regrets the noncompliant occurrence of storm water discharge from the referenced project site. We require contractors engaged in the performance of our projects to maintain compliance with the applicable Storm Water Pollution Prevention Plans.

In response to the two Notices of Violation issued by TDEC, and referenced in your letter, the University's contractor took remedial actions immediately to bring the site into compliance.

The University will continue to work diligently with our contractors, designers, and TDEC representatives to achieve and maintain compliance with the applicable Storm Water Pollution Prevention Plans.

Please let me know if you have additional concerns or questions.

Sincerely,

George S. Criss  
Director of Facilities Planning
