

## What to Do:

Take pictures of stream pollution and flooding in Knox County. Include the street name or subdivision name where you took the picture. Send pictures to the following people with this message:

*"I'm frustrated with ongoing flooding in our neighborhoods and pollution in our streams. It must stop! Take action to make sure Knox County adopts an effective stormwater ordinance. John Doe, Knox County Clean Water Alliance."*

**Silt, or mud, is Tennessee's #1 polluter of our waters.**

Brown water should NEVER leave a pipe. This is illegal.

Brown water should NEVER leave a pond or a basin like this one above. If you see a pond overflowing with brown water or leaking brown water, take a picture! If a pond is holding brown water, that is ok (*see below*).

**Silt in our water causes flooding!**

These black structures are called silt fencing. No water, mud or dirt should ever leave a silt fence. If you see water, mud or dirt on the other side of a silt fence. Take a picture!

Silt fencing should be buried to stop water, mud or dirt from leaving a construction site. This fence is not buried. You can see underneath it!

**Stop polluting our streams!**

Brown water should NEVER leave a development site and run into another stream. Here you can see brown water running into a clean stream. This is pollution. It causes flooding, kills aquatic life and transports chemicals. If you see these, take a picture!

**We need your help!**

**Show Knox County *why* we need to adopt a more protective stormwater ordinance to **STOP** flooding our homes and polluting our streams.**

**Send in your pictures today!**
